

Dear Customer,

The company 4MMGP (www.4mmgp.fr) expert for industrial maintenance, precision mechanics and prototypes as well as assembly jigs will join SFOP Press Tools & SUPRA Technologies within NATO Groupe.

Already now the potential synergies are huge. Others will occur during the next years to come. A tough investment program is already launched and will continue in 2017. This in terms of human resources and equipment. Each entity will keep and develop its special activities and production site. Central services as sales, design, industrialization, purchase and administration will be put in place to ensure an efficient support for 4MMGP and SFOP & SUPRA.

Our team is enthusiastic. This project will give live to a small but smart industrial group in the center of France.

Your SFOP & SUPRA Technologies – 4MMGP Team
